SILVER X MINING CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (UNAUDITED)
For the nine months ended September 30, 2024
(Expressed in US Dollars)

1. CORPORATE INFORMATION

Silver X Mining Corp. (the "Company") was incorporated under the *Business Corporations Act* of British Columbia on June 4, 2009. The Company is listed on the Toronto Stock Exchange Venture (The "TSXV") under the symbol AGX, the U.S. Over The Counter Market (The "OTCQB") under the symbol AGXPF and the Frankfurt Stock Exchange under the symbol AGX.

The Company's principal business activities are directed towards mineral production and exploration and development of mineral properties in the Americas.

The address of the Company's corporate office and principal place of business is Suite 1012 – 1030 West Georgia Street, Vancouver, BC, V6E 2Y3.

2. BASIS OF PREPARATION

Statement of Compliance with International Financial Reporting Standards ("IFRS")

These unaudited condensed consolidated interim financial statements (the 'Financial Statements') have been prepared in accordance with IAS 34 – Interim Financial Reporting as issued by the International Accounting Standards Board ("IASB"). Accordingly, certain disclosures included in annual financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the IASB have been condensed or omitted and these Financial Statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2023.

Other than as stated below, these Financial Statements follow the same accounting policies and methods of applications as the most recent audited consolidated financial statements of the Company.

The Company's interim results are not necessarily indicative of its results for a full year.

The preparation of condensed consolidated financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in annual audited financial statements. Certain comparative figures have been reclassified to conform to the current year's presentation.

Going Concern and Continuance of Operations

These Financial Statements have been presented on the basis that the Company will continue as a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. Realization values may be substantially different from the carrying values shown and these Financial Statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. As at September 30, 2024, the Company had an accumulated deficit of \$65,645,932 (December 31, 2023 - \$62,090,518) since inception, and the Company's working capital deficit was \$14,303,289 (December 31, 2023 – deficit \$15,139,488). The Company may incur further losses in the development of its business.

The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary capital either through external financing sources or organically through the ramping up of its production to meet its obligations and repay its liabilities arising from normal business operations when they come due, which in part, depends on prevailing market conditions, commodity prices and operational success. While the Company has been successful in securing financing in the past, there is no assurance that it will be able to do so in the future.

2. BASIS OF PREPARATION (continued...)

Basis of Consolidation

The Financial Statements include the accounts and results of operations of the Company and its wholly owned subsidiaries listed in the following table below.

A subsidiary is an entity in which the Company has control, directly or indirectly, where control is defined as the power to govern the financial and operating policies of an enterprise to obtain benefits from its activities. All material intercompany transactions and balances have been eliminated on consolidation.

2. BASIS OF PREPARATION (continued...)

Change in functional currency.

Effective June 30, 2024, the Company adopted the US dollar as its functional currency for all of its Peruvian entities. Prior to June 30, 2024, the functional currency of the Peruvian companies were the Soles. The Canadian operation is considered self-sustaining with the Canadian dollar as its respective functional currency. The remaining foreign operations are considered integrated and have the US dollar as their functional currency.

The change in functional currency is due to the increased exposure to the US dollar as a result of the growth in international operations. The adoption of the USD as the functional currency of the Peru operations is the result of the increased exposure to USD transactions.

5. EXPLORATION AND EVALUATION ASSETS

a) Coriorcco & Las Antas Property, Peru

In June 2024, the Company decided not to renew the option on the Coriorcco and Las Antas project, after deciding to concentrate on more prospective exploration projects. The project was fully impaired at December 31, 2023, resulting in an impairment loss of \$4,415,637. During the nine months ended September 30, 2024, the Company has not capitalized any exploration expenditures incurred in Las Antas property.

b) Lily 19 Claims, Peru

Silver X acquired the Lily 19 claims through an earn in agreement with Barrick Gold Corp. in Q4 2021. Under the terms of the of the agreement, to acquire a 100% interest in the project Silver X must:

- Complete at least 3,000 m of diamond drilling in the concession
- Map and sample the surface
- Maintain the claims in good standing
- Make a one-time payment of \$25,000 (paid)

Within four (4) years of the date of signing, or two (2) years from receiving a drilling permit for the property. Furthermore, Barrick will retain a 2% NSR, of which 1% can be bought back for \$2,000,000.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these consolidated financial statements.

General Objectives, Policies and Processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's management. The Board of Directors receives periodic reports through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility.

The Company's risk exposure and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and other receivables. The Company has concentrate contracts to sell concentrates produced. Concentrate contracts are a common business practice in the mining industry. The terms of the concentrate contracts may require the Company to deliver concentrate that has a value greater than the payment received at the time of delivery, thereby introducing the Company to credit risk of the buyers of concentrates. Should any of these counterparties not honour the purchase arrangements, or should any of them become insolvent, the Company may incur losses for products already shipped and be forced to sell its concentrates on the spot market or it may not have a market for its concentrates and therefore its future operating results may be materially adversely impacted. The majority of the Company's concentrate is sold to one concentrate buyer. The Company limits exposure to credit risk by maintaining its cash with large financial institutions and by monitoring the risk associated with its concentrate sales. The Company does not have cash invested in asset-based commercial paper.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. The Company is exposed to liquidity risk.

Commodity Price Risk

Market risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will significantly fluctuate due to changes in market prices. The value of financial instruments can be affected by changes in interest rates, foreign currency rates and other market prices. Management closely monitors commodity prices, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued...)

Foreign Currency Risk

The Company's operations in Canada and Peru creates exposure to foreign currency fluctuation. Some of the Company's operating expenditures are incurred in Peruvian SOL or Canadian Dollar, and the fluctuation of foreign currencies with the US dollar will have an impact upon the profitability of the Company and may also affect the value of the Company's financial assets and liabilities. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks.

The Company's financial assets and liabilities in various currencies as at September 30, 2024, are set out in the following table:

September 30, 2024	Canadian Dollar	US Dollar	Peruvian SOL	Total (USD)
Cash and cash equivalents	1,622	149,303	39,558	190,484
Receivables	28,652	6,057,180	435,124	6,520,955
	30,274	6,206,483	474,682	6,711,439
Accounts payables and accruals	235,709	(13,352,942)	(7,176,569)	(20,293,802)
Lease	-	(124,427)	-	(124,427)
Debenture	-	(1,607,631)	(8,151)	(1,615,782)
Net asset (liabilities)	265,983	(8,878,517)	(6,710,038)	(15,322,572)

The Company's financial assets and liabilities in various currencies as at December 31, 2023, are set out in the following table:

December 31, 2023	Canadian Dollar	US Dollar	Peruvian SOL	Total (USD)
Cash and cash equivalents	1,656	434,868	48,378	484,902
Receivables	3,645	-	4,575,510	4,579,155
	5,301	434,868	4,623,888	5,064,057
Accounts payables and accruals	(318,737)	-	(19,224,259)	(19,542,996)
Lease	-	-	(320,891)	(320,891)
Debenture	-	-	(1,441,777)	(1,441,777)
Net asset (liabilities)	(313,437)	434,868	(16,363,039)	(16,241,607)

The Company's reported results will be affected by fluctuations in the Canadian dollar to US Dollar and Peruvian SOL to US Dollar exchange rate. As at September 30, 2024, a 10% depreciation of the Canadian Dollar relative to the US Dollars would have decreased net financial liabilities by approximately \$24,000 (December 31, 2023 - \$28,000). A 10% appreciation of the Canadian Dollar relative to the US Dollar would have had the equal but opposite effect. As at September 30, 2024, a 10% depreciation of the Peruvian SOL relative to the US Dollars would have decreased net financial liabilities by approximately \$610,000 (December 31, 2023 - \$1,432,000). A 10% appreciation of the Peruvian SOL relative to the US Dollar would have had the equal but opposite effect.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued...)

Interest Rate Risk

Interest rate risk consists of two components:

- i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- ii) To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

As at September 30, 2024, a 1% change in market interest rates would result in no material change in value of the assets or liabilities of the Company.

Other Price Risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk, currency risk, or equity price risk. The Company is not exposed to any other price risk.

Determination of Fair Value

When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The carrying amounts for cash, receivables, accounts payable and accrued liabilities and due to related parties' approximate fair values due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Fair Value Hierarchy

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

Valuation techniques for receivables from provisional concentrate sales:

A portion of the Company's trade receivables arose from provisional concentrate sales and are valued using quoted market prices based on the forward London Metal Exchange for gold, copper, zinc and lead and the London Bullion Market Association P.M. fix for silver.

16. CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to advance its mineral properties and pursue growth opportunities. The Company defines its capital as shareholders' equity. The Company manages its capital structure and makes adjustments to it to effectively support the acquisition and exploration of mineral properties.

The properties in which the Company currently has an interest in are in exploration, development and production stages; as such, the Company is dependent on external financing to fund its exploration and development activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company monitors its cash, investments, common shares, and stock options as capital. There have been no changes to the Company's approach to capital management during the nine months ended September 30, 2024. The Company's investment policy is to hold cash in interest-bearing bank accounts or highly liquid short-term interest-bearing investments with maturities of one year or less and which can be liquidated at any time without penalties. The Company is not subject to externally imposed capital requirements and does not have exposure to asset-backed commercial paper or similar products.

The Company does not expect its current capital resources to be sufficient to cover its operating capital and corporate general and administrative expenditure through the next twelve months and as such, will need to obtain additional capital resources. Actual funding requirements may vary from those previously planned due to a number of factors, including the progress of the Company's business activities and economic condition.
